

Infrared Thermometer:PC868

Specification

Product type: Non-Contact	Dimension: 149(L)*95(W)*45(H) mm
Measuring part: Forehead	Measuring duration: 1s
Measuring distance: 3-5cm	Automatic stop: 7Sec
Power supply: DC 3.0V (2 pcs AAA battery) ^{°C}	Memories: 99 measurements
Measuring range: Body: 32.0~42.9°C Surface: 0.0~100.0°C Animal: 32.0-45.0°C	Measuring precision: Body: ±0.2°C Surface: ±1.0°C Animal: ±0.4°C
Measuring resolution: 0.1°C	Warranty: One year
Operating Environment: Temperature: 10~40°C, Humidity: ≤85%	Storage Environment: Temperature: 0~50°C, Humidity: ≤93%
Fever alarm: Yes(three colors status light)	Certificate: FDA (510K), ISO13485 2016, CE

Infrared Thermometer non-touch PC868

Infrared Thermometer non-touch. PC868 Infrared Thermometer.

An infrared thermometer measures temperature, and is a good scanning tool for fever. This device is used for measuring of temperature on humans. Its non-contact measurement system allows distance measuring up to 5cm – allowing the temperature taker to stand at arm length to measure fever. Please note the ambient

temperature (room temperature) is required to be at between 10 and 40 degrees for an accurate measurement.

This permits temperature measurement from a distance without contact with the object to be measured. A non-contact **infrared thermometer** is useful for measuring temperature under circumstances where thermocouples or other probe-type sensors cannot be used or do not produce accurate data for a variety of reasons.

This Infrared Thermometer features:

- A Non-contact for forehead measurement
- 3 – 5 cm distance
- 1 sec diagnostics rate
- Requires 2x AAA Batteries for use
- Automatic Stop -7 sec
- Memory- 99 measurements
- Dimensions – 149(L)*95(W)*45(H)mm
- SKU: PC868
- 3-colour fever status
- Measuring range between Body (32 – 42.9 Degrees), surface (0 – 100) , Animal (32 – 45)
- Operating Environment: 10 – 40 Degrees, Humidity (85% and more)

Packaging information:

- Box
- Soft Carry Bag
- Small tool to open battery holder
- Instruction Manual
